WORK EXPERIENCE

Product Designer/Developer

Solar Audio Software
March 2021 - current / Toronto, ON

- Founded a small business to sell affordable, innovative audio software for musicians.

- Conceived of and designed AnyDrum, an audio effect that allows for musicians with minimal resources to easily produce professional-quality drum recordings.

- Used the JUCE C++ audio development framework alongside Visual Studio and Xcode to program and assemble front- and back-end components of the software.

- Continually revised and updated code to make software cross-compatible with Windows, macOS, Linux, and the most popular digital audio workstations.

- Planned and built a website using Shopify, and integrated digital downloading to enable sales of the software.

- Illustrated and customized various visual elements of the website, including eye-catching imagery, buttons, links, and page text.

- Introduced a free trial version, managed social media accounts, and directed detailed video production/editing as part of the business' marketing efforts.

Accounting Clerk

CIBC/INTRIA
October 2018 - August 2020 / Toronto, ON

- Handled large cash deposits from 100+ corporate clients, ran money counters and inspected counterfeit currency in an active, fast-paced work environment.

- Assisted in transporting crates of processed cash deposits to vault.

- Conceived of and developed a computer program aimed to enable quicker communication between clerks and supervisors.

- Regularly took extra shifts and worked effectively with different teams.
