

Sava Solar

Independent Developer / Technical Specialist

Toronto, ON

savasolar@gmail.com | <https://github.com/savasolar>

PROFESSIONAL SUMMARY

Independent Developer and Technical Specialist with hands-on experience across software development, audio technology, electronics, and physical prototyping. Strong background in full-cycle software development using C++ and Python across Windows and macOS environments. Experienced in audio equipment programming and installation for large venues, electronic circuit design, and building functional prototypes that integrate hardware and software. Adept at working independently and presenting technical products to professional audiences.

TECHNICAL SKILLS

Software & Programming

- C++, Python
- Full software development lifecycle: analysis, design, testing, deployment
- Cross-platform development: Windows, macOS
- Audio plugin development for music platforms
- Proprietary audio software environments
- Website development: HTML, JavaScript, templates

Audio & AV Systems

- Audio equipment programming and installation in large venues
- Programming Crestron devices using SIMPL
- Installation and configuration of presentation systems
- Professional audio systems integration

Hardware, Electronics & Prototyping

- Electronic circuit design and prototyping
- Microcontroller programming
- Soldering and hardware assembly
- Synthesizer and effects pedal development

3D Design & Fabrication

- 3D printing and execution of production prints
- Reading and interpreting technical drawings
- 3D design using Fusion
- Programming for 3D printing workflows

Metal & Mechanical Fabrication

- Metal cutting, drilling, folding, and welding
 - Fabrication of metal enclosures for prototypes
 - Mechanical assembly for functional hardware products
-

PROFESSIONAL EXPERIENCE

Independent Developer

2021 – 2022, 2025

- Designed and developed audio plugins for music production platforms using C++ and Python
 - Delivered cross-platform solutions for Windows and macOS
 - Managed full development lifecycle from concept and analysis to testing and deployment
 - Developed hardware prototypes for synthesizers and audio effects pedals
 - Designed and assembled electronic circuits, including microcontroller programming
 - Built physical prototypes, including custom metal enclosures and soldered components
 - Presented a new audio product at the AES Conference in New York City
-

Field Analyst

ClearAlan | 2023 – 2024

- Installed and programmed professional audio and presentation systems
 - Programmed Crestron control systems using SIMPL
 - Deployed and configured AV solutions in large institutional environments
 - Completed installations at Seneca College, Humber College, and more
 - Collaborated with technical teams to ensure reliable system performance
 - Conducted on-site testing and troubleshooting of AV equipment
-

Accounting Clerk

CIBC | 2019 – 2020

- Processed cash deposits from corporate clients with high accuracy
 - Verified and authenticated currency, detecting counterfeit bills
 - Maintained strict adherence to financial compliance and security procedures
 - Worked efficiently in a high-volume, deadline-driven environment
-

EDUCATION

Bachelor of Arts (Honours)

Toronto Metropolitan University
